

# rDirectoryCE

**A flexible enterprise web-based employee directory  
and a search engine that deploys in minutes!**

rDirectoryCE (Community Edition) is a pre-configured, easy to use, web-based directory and search engine that installs in just minutes — *and it's absolutely free!* rDirectoryCE immediately empowers your employees with flexible search options, OCS/LCS integration, the ability to download contact information directly into Outlook Contacts with one click, and more — *all using native Active Directory permissions.*

Register your rDirectoryCE within 30 days of your download to receive a permanent license key. That's right, the community edition of rDirectory can be yours forever, for free!

## rDirectoryCE Features

You can download and deploy a professional Employee Directory website and search engine in just a few minutes and start leveraging the data in Active Directory using these features:

- Fully web-based, rDirectoryCE is accessible anywhere, anytime, from any computer
- Permanent keys issued when rDirectoryCE is registered within 30 days of download
- No client installation required because it is completely browser-based
- Navigate organizational relationships (manager/direct reports) and view group memberships
- OCS/LCS integration displays precise information for users to start an instant message chat or to view availability for meetings, etc.
- Export data to Outlook Contacts from the directory
- Launch email

## rDirectoryCE Ease-of-Use

rDirectoryCE is a compact, easy-to-use employee directory software that enables any business to provide their employees with instant access to employee information, from any browser, anywhere; Human Resource Departments love it!

rDirectoryCE is the quickest, easiest way for managers and employees to put their hands on the most complete and up-to-date information on coworkers including work, cell, and pager numbers, email, OCS/LCS instant messaging, and other contact details.

rDirectoryCE is completely searchable; search for a staff members based on name, partial name, location, or department.

rDirectoryCE will help you GO GREEN for free. Using rDirectoryCE you can eliminate the need to print and distribute traditional phone lists and other employee related lists, such as departmental listings and home address lists. *Think of the time, the paper and the resources you will save!*

**rDirectoryCE  
Rocks your  
world for FREE  
and helps you  
GO GREEN at  
the same time!**

- **FREE Web-based directory**
- **FREE lifetime license key**
- **Installs in 5 minutes**
- **Secure, preconfigured out-of-the-box**
- **OCS/LCS Integration**
- **Connect to SharePoint services**

*"Last week one of our Technical Services guys downloaded and installed your Community version of rDirectory. This is some great software. I, the SharePoint programmer, added a link for our soon to be production SharePoint site. rDirectory will be a huge plus for our users to have access to via the SharePoint site. We need to stay with the Community version for a while and get the executives here to buy into it. At which time, I would like to look into buying the full Enterprise version."*

- Joel Sandel, Sharepoint Programmer  
USA-based telecommunications provider

## How rDirectory Works:

Most administrators are familiar with the common schema (classes and attributes) exposed by the Active Directory Users and Computers tool, but are surprised to learn that the standard Active Directory schema defines nearly 400 classes and 2,000 attributes.

rDirectory does not extend the schema or require extensions. It simply discovers the schema you already have and allows you to compose applications that leverage virtually any class, attribute, or relationship your schema defines, including any custom classes or attributes added for your organization's unique needs.

## Authentication Modes:

rDirectory supported authentication modes:

- Forms
- Anonymous
- Integrated Windows

## Minimum Requirements:

- rDirectory can be installed with IIS hosted on the following platforms:
  - Windows 2003 Server
  - Windows Server 2008
- Active Directory
  - Windows 2003 native or mixed mode
  - Windows Server 2008 native or mixed mode
- IIS with ASP.Net support
- Internet Explorer 6.0 and above
- .NET Framework 3.0 (sp1)

rDirectoryCE saves time and money because there is never client software to distribute, install, configure or maintain. You do not need to spend time or money for extensive training because it is 100% web-based, and any employee with access to a browser can easily access the directory and quickly learn to use the application.

IT Departments love it because it utilizes Active Directory without the need for programming, is out-of-the-box configured, easy-to-use and can easily be linked to from a SharePoint site, or your company's intranet.

## Need More Power and Flexibility?

rDirectoryCE is a great place to start, however, if your organization needs more functionality than the free edition can deliver, you can choose the edition with features to meet your specific organizational needs.
