

FOR IMMEDIATE RELEASE

Namescape Announces Record Sales for Q2, 2010

Demand for Active Directory Tools Drives Growth

Phoenix, AZ. July 22, 2010 – [Namescape](#), a leader in identity information management applications, reports a second, consecutive record quarter with revenue growth in customers and sales for Q2, and a 12% year-to-date increase in sales over 2009.

“We are very encouraged by the trends we are seeing so far this year”, says Evan Buchanan, Vice President of Sales at Namescape. “We have experienced significant wins in healthcare and global manufacturing, while consistently advancing further into the education market. The volume of sales continues to rise each month - a strong indicator that despite a still-recovering economy and tight budget constraints, Namescape is responding to our customer’s needs for secure identity information and password management.”

[rDirectory](#) is the industry leading identity application design platform for creating customized, web-based solutions to search, delegate, administer and provision users and groups using secure role-based access controls and best of breed self-service management features.

[myPassword](#) is an easy to use, yet extremely powerful, self-service password management solution that provides a cost-efficient, safe and secure method for users to reset forgotten passwords and manage locked accounts. With its rich feature set and intuitive web-based interface, myPassword minimizes user downtime and dramatically decreases help desk costs, while providing an immediate and measurable ROI to the organization.
